Academic Research Experience

Fordham University - Economics Department

ADVISOR: DR. SUBHA MANI

2024 - Present

- Current Project: Effects of Congestion Pricing on Collisions and Injuries in New York City.
- Description: This paper examines New York City's recent congestion pricing policy, exploiting sharp spatial and temporal variation created by the congestion charge boundary and implementation date to estimate short-run, causal effects on traffic collisions and injuries. Results are used to convey urban welfare gains and medical cost savings estimates.

New York University - Economics Department

ADVISOR: DR. SAHAR PARSA

2021-2022

- Project: Exploring the Evolution and Impact of The Gender Gap On Students Self-perceptions.
- Description: In this project, we hypothesize and test that an individual's economic circumstance maps back into their self-perception relative to others in society. Specifically, explore how economic prosperity and downturns impact self-perceptions in intelligence and ability for 12th graders in the US.

Fairfield University — Department of Economics

ADVISOR: DR. WILLIAM VASQUEZ

2015-2017

- Project: Rural Water Sustainability — Examined variation in Guatemalan villages' willingness to pay for localized well-water systems.
- Description: In collaboration with Engineers Without Borders, conducted household-level surveys to estimate villages willingness to pay for microfinance-based well-water infrastructure in remote communities.

Publications _____

Factors Influencing Carbonated Soft-Drink and Bottled Water Consumption: Survey Evidence from Nicaragua. 2019. International Journal of Health Promotion and Education.
